Subject: CalRidge Noise Event, 2:30 AM May 23rd

Dear County Board Members,

Now would be a good time to come over.....I am wide awake, experiencing extremely loud conditions inside my bedroom. This noise exceeds the IEPA allowance for industrial noise to enter my property line. Nights like this will cause your boardroom to be packed with angry homeowners. You will hear from them.....there will be crazy people who bang pots and pans outside your homes. Your future will include lawsuits from them. You are not protecting the public from real damages. I guarantee that events like this will become uncomfortable for people like you. It will tear apart our community. PLEASE reconsider your setback rules for wind farm development. This is in your control right now.....don't waste the opportunity to fix it before it gets worse.

Dear Vermilion County Board Members,

Please feel free to come visit us in our home tonight. It is very noisy.....even worse than last night, but not as bad as Mother's day. Please call my cellphone [217.840.1612](tel:217.840.1612) and I will let you inside. Maybe since most of you do not check email very often, I could put you on speed dial and then call or text when we are suffering. Right now, my air conditioner is on full blast, and the turbine noise is predominately louder here inside my house. It's not too late to stop yourselves from allowing others to be hurt by wind turbine noise. If you don't come out and listen to this for yourselves sometime, you are not making decisions based on facts.....you are not serving the citizens of this county.

Thanks.
