Subject: Calridge Noise Event, 4/16/2013

Dear Matt,

Let's try something different tonight.....let's only shut down WTG #57.....the one to the southwest seems to be the most problematic tonight.

I have been working hard to find the combination of contractors willing to take on this noise insulating project. I have not had time in my busy schedule. I am just getting to bed here myself. I will keep working on things as fast as possible. Any suggestions you can make or give would be appreciated.

Ted
