Subject: RE: Calridge noise event, 2013-04-16

We had a very rough night last night.....lots of sleep interruption from turbine noise. Update: contactor making house visit today to measure surface areas and window sizes. Jess and I have spent up to 100 hours talking to experts, looking for information, going to meetings, trying to find help so far. Please continue to be patient with us as we are trying to fix the problem as fast as possible. Thank you for shutting down the turbines when we needed it.

Ted
