Subject: RE: California Ridge Discussion

Ted,

I wanted to take a minute to answer some of your questions.

Who do we submit our information to? Submit everything directly to me.

who reviews/approves our stuff? Our Asset Manager, John Majewski, will review and then get any mitigation plan approved by an officer of California Ridge Wind Energy LLC.

What would be a timeline for the process so repairs can begin? As soon as we have the three quotes we can evaluate them and decide on a course of action.

Does InvEnergy issue a lump sum check for the construction costs? If the approved mitigation plan involves home improvement expenses, then California Ridge Wind Energy LLC would prefer to issue a check in advance for a pre-determined portion of the scope of work. Other arrangements are available and we're will to cooperate with you as we have demonstrated, however, we need you to act in good faith as well. Getting the three quotes is the first step to this process.

Let me know if you would like to discuss further.

Regards,

Matt Wingler
